

# Hybridisation Incubators

The Techné name has long been associated with quality incubators for hybridisation, as flexibility of sample formats coupled with accurate temperature and speed control are key to producing quality results each and every time. Versatile tube formats, allowing small probe volumes to be used and the ability to perform various applications simultaneously are common to both models.

## Hybridisation Accessories

Versatile multiple tube formats; mix and match sizes within an instrument to cater for different throughputs, users and applications.

- Tubes and other accessories can be accommodated at the same time for multiple uses
- Low probe volume, even with large glass tubes. Rotation and design ensure volumes as low as 5ml can be used and recovered
- Unique "slot-in" tubes; with tube rotation speed of 0 to 20 rpm; controllable to suit your application
- Tube holders; each holds up to 16 x 15ml or 8 x 50ml tubes
- Radioactive safe; protective casing and non-drip tube design minimises risk to the user.
- Selectable speed rocking platform; (0 to 60 opm) to cater for membrane-bound and slide-bound hybridisations
- Adjustable feet; for levelling on uneven surfaces
- Static shelf; where heating without movement is required
- Drip tray; removable for easy cleaning

## Tubes

Glass hybridisation tubes reduce volumes, simplify washing and improve signals!

- 3 sizes available: small, mini and unique large tubes
- Durable: thick borosilicate glass
- Easy pour: non drip, safe and convenient
- Sealing ring: 'O' ring-sealed end caps ensure no leakage!
- Escape thread on screw cap: easy opening with no vacuum problems
- Tube assemblies: adaptors to hold multiple small glass tubes for increased capacity

## Incubator Accessories

### Tube holders

Tube holders with clips, available to carry 16 x 15ml or 8 x 50ml tubes. Ideal for higher throughput of smaller samples.

### Selectable speed rocking platform

It sits neatly in the base of the unit while still allowing a number of hybridisation tubes to be placed above. Made from stainless steel, the rocking platform enables membranes to be processed using a wave motion. Speed range of 0 to 60 oscillations per minute.

### Static shelf

Up to 2 (Hybrigene HB-3D) or 3 (Hybridiser HB-1D) static stainless steel mesh shelves can be placed into the tube locators allowing the unit to be used as a simple non-motion incubator. Each shelf can hold up to 4kg.

### Membrane separators

Strong, re-usable porous mesh sheets for placing between membranes. Ensures even hybridisation when processing multiple hybridisation membranes in one tube. Available in packs of 5 (20 x 20cm).

### Hybridisation tube rack

Useful storage facility for tubes during membrane loading or when not in use. Carries up to 3 large and 3 small tubes.

**Holder F15ML1TH (HB-1D only)**
